

# Enabling the Hybrid Workplace

COVID-19 has changed the world as we knew it.

The pace, nature and scale of change is  
**unprecedented.**

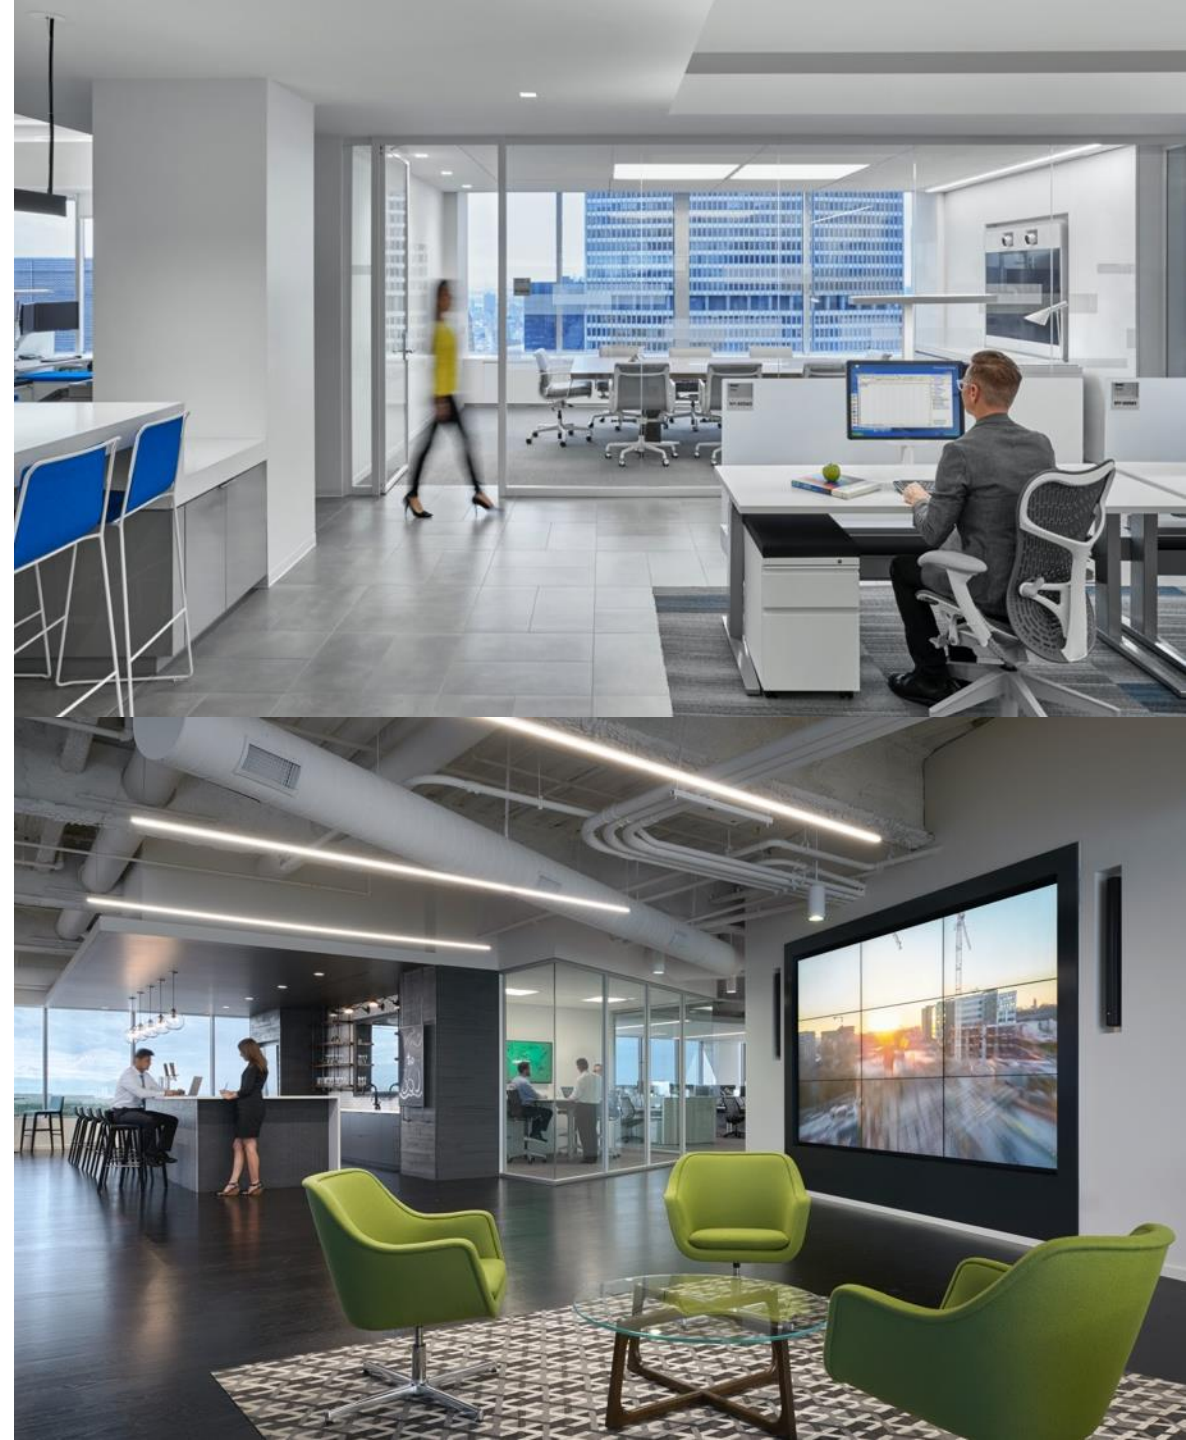

With this, organizations are acting swiftly to  
protect their people and plan for a controlled  
**re-entry** to the workplace.

**Technology will be a key enabler.**

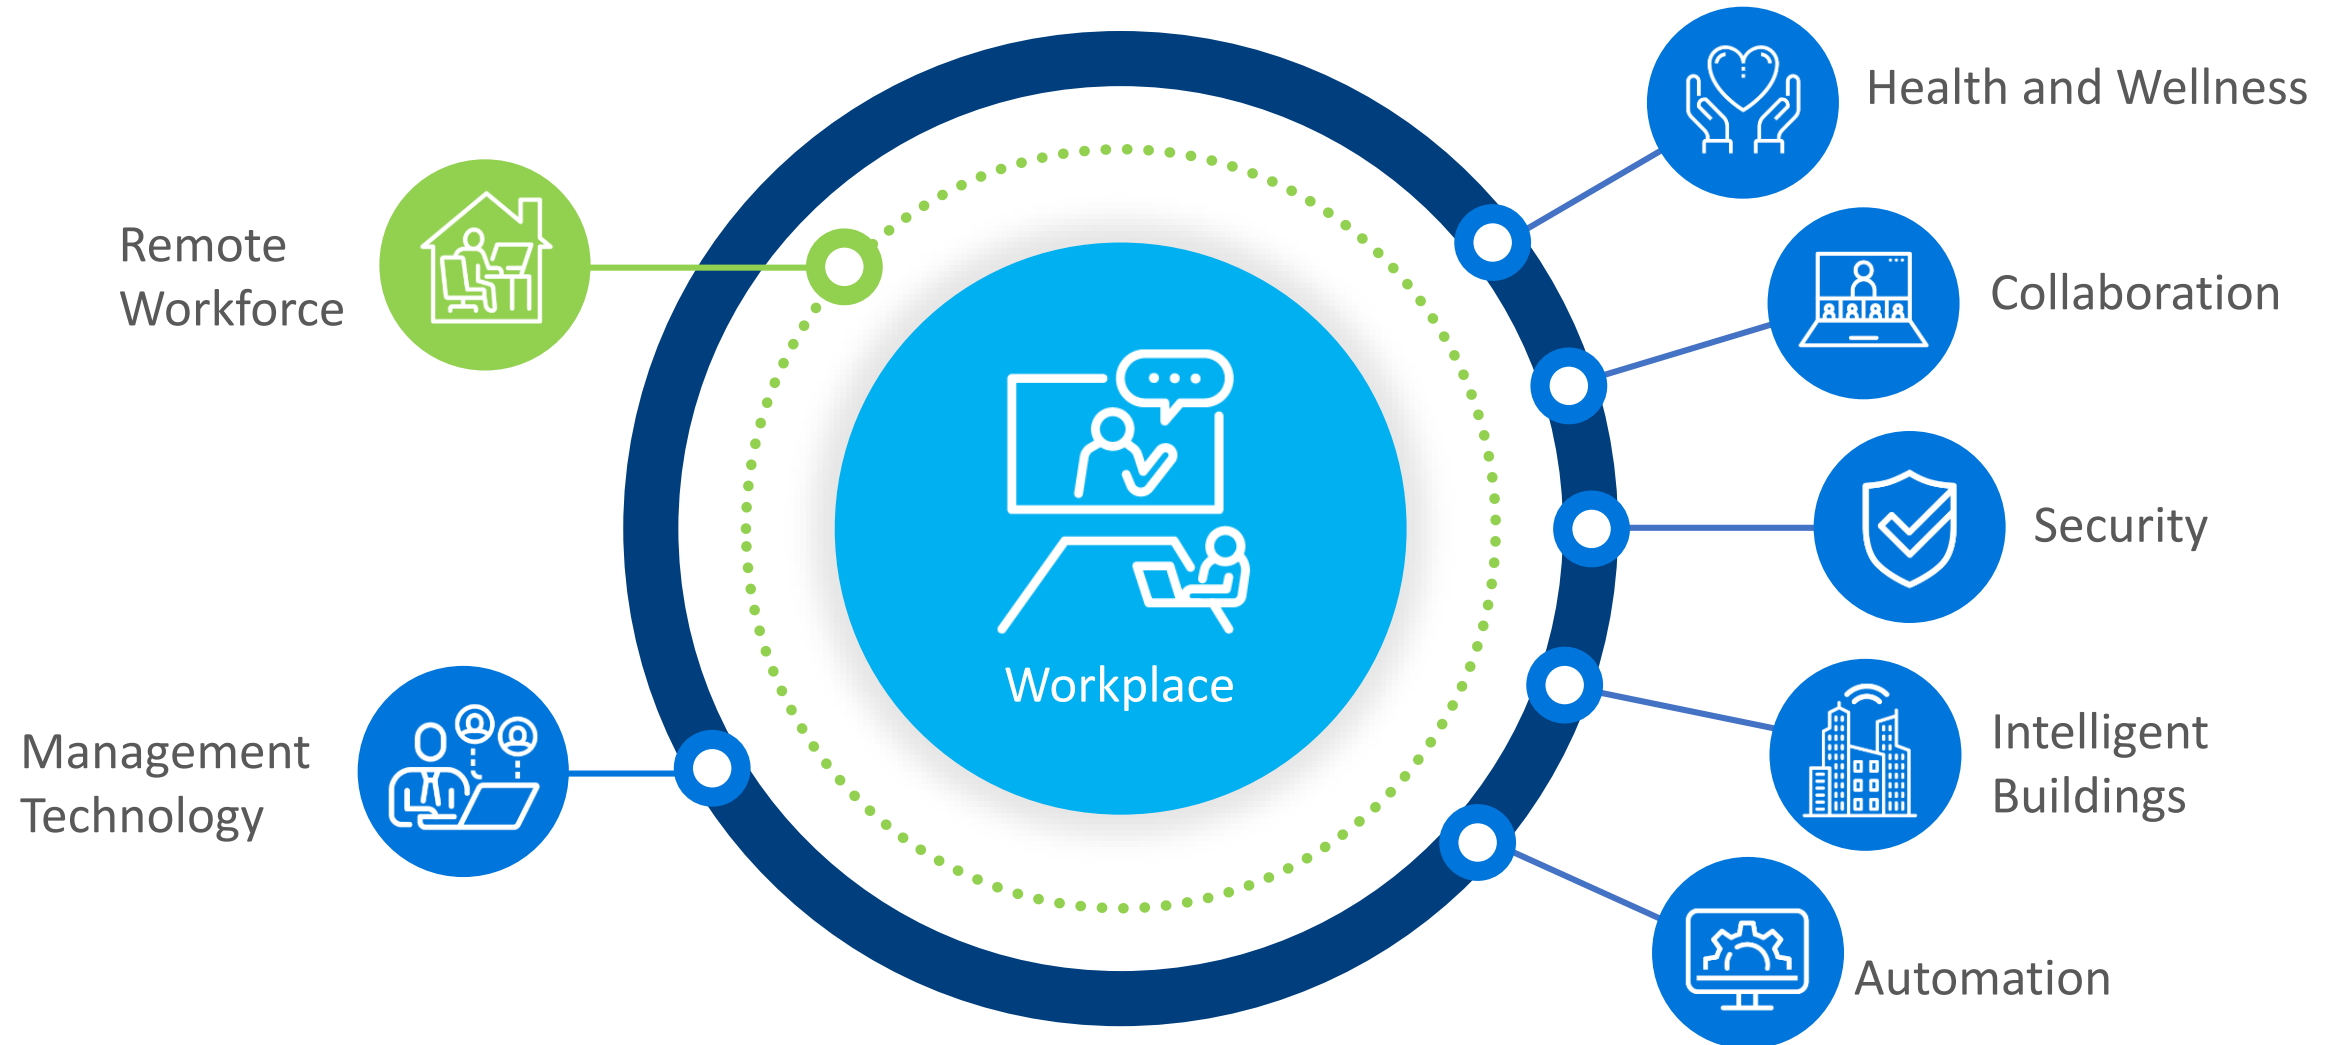

# The Hybrid Workplace

The digital workplace will adapt and become hybrid.

- Flexibly extending its reach to the remote workforce
- Stretching its capabilities within workplace walls

# Enable the Hybrid Workplace

# Health and Wellness

## Well-being and safety of workforce is priority

- Promote physical and psychological health
- Preserve organizational culture
- Enable social distancing with human interaction
- Clearly convey safety protocols
- Increase company wide corporate video broadcast communications

# Collaboration

## Video collaboration for teams near and far

- Maintain face-to-face communication, teamwork
- Provide consistent user experience for remote work
- Plan for technology infrastructure flexing
- Prepare for more activity-based workspaces
- Connect non-traditional spaces, like manufacturing floors, warehousing and operations with video technology

**>55% organizations will continue to offer work from home flexibility**

# Security

## Security is paramount - within workplaces and within applications

- Consider digital thermography screening at entries
- Review cybersecurity policies and understand built-in permission and privacy protocols of UCC providers
- Prepare for resurgence of BYOD

# Intelligent Buildings

## Smart buildings will become intelligent buildings

- Design responsive environments driven by AI and ambient computing
- Use IoT and predictive analytics to track and alert density
- Deliver intelligent space scheduling to maintain social distancing
- Integrate IWMS with space and pro-active technology monitoring and management

# Automation

## Automation will streamline workplace and workforce interaction

- Deploy virtual digital assistants e.g. Alexa for Business
- Offer personalized wayfinding
- Automate workspace assignments
- Offer remote concierge services to launch meetings and provide amenities as part of the touchless office

# Empowering the Hybrid Workplace

AVI-SPL has the experience and expertise to help organizations of all sizes design their **hybrid workplace**

<b>Principles</b>	<b>Simplified - Standardized - Scalable - Serviceable - Secure</b>
<b>Technology</b>	UCC (Cisco, Microsoft, Zoom, Pexip), meeting solutions (Crestron, Samsung, Shure etc.) enterprise video (ReadyCam studios, webcasting, content distribution and management) and user experience management (AVI-SPL Symphony)
<b>Services</b>	Assessment, design, roadmap consultations for pivoting to an elastic digital workplace, technology integration, managed services, production services, support and maintenance

**Work with AVI-SPL to create your  
action plan to transform the workplace  
of yesterday to the hybrid workplace of  
tomorrow.**
