

5 Key Charters to Empower Employee Experience in Flexible Work

Today, employees want flexibility. Despite that, they want the same experience connecting with people, whether they are working remotely or in person. The success for your flexible workspace largely depends on how business leaders empower your teams with inclusive, productive, and secure communication and collaboration.

Explore the five key charters to unlock the true potential of a flexible workspace.

Reimagine Physical Meeting Spaces

In many meeting rooms, the focus is at the center of the table, prioritizing physical over remote participants.

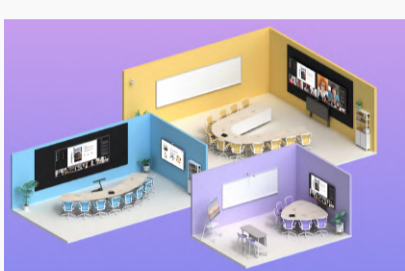

Signature Microsoft Teams Rooms boost inclusion by reorienting the focus at the screen, bringing remote and physical participants 'face-to-face' with each other.

A front-row experience for all

Optimized placement for speakers and whiteboards

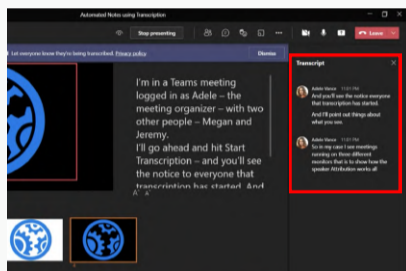

Scalability for all room sizes – small, medium, and large

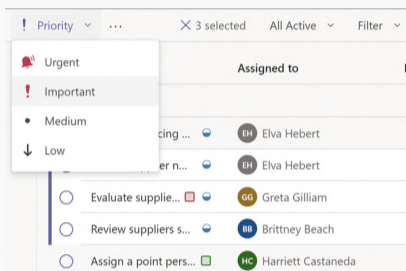

Supercharge Productivity with AI

We are overwhelmed with notes and information, especially given a 252%¹ increase in time spent in meetings since before the pandemic.

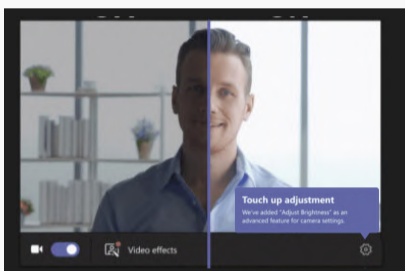

Leverage AI to reduce the digital debt and work 'smarter, not harder.'

Automated meeting notes

Task recommendations and personalized highlights

AI-enabled audio/video to foster inclusiveness

Make Hybrid Collaboration Work

Hybrid discussions can make it incredibly difficult for people to co-ideate and co-create.

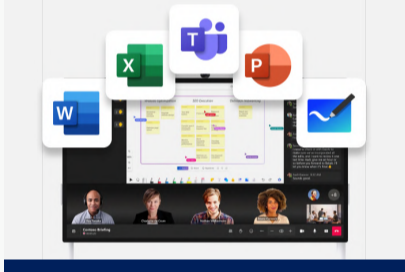

With Microsoft Surface Hub 3, fuse the divide between whiteboarding and your hybrid meetings, all in one place, to elevate collaboration.

Collaborative whiteboarding across hybrid participants

Portability and mobility across different physical spaces

Familiar Microsoft Teams and productivity applications experience

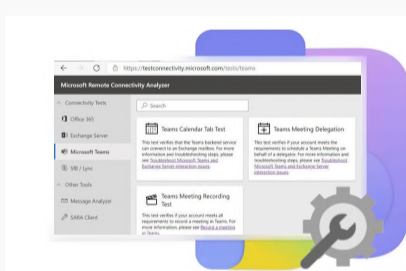

Simplify Remote IT Management and Monitoring

The IT management challenge compounds significantly with hybrid meetings.

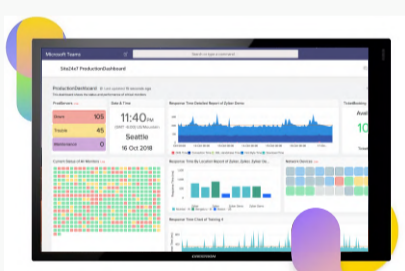

With AVI-SPL and Microsoft, joining a Teams Rooms meeting is as easy as walking into the room – No plugging in, no struggling through setups, and no call drops.

Standardize on Microsoft Teams Rooms and Microsoft Teams Phone

Remotely troubleshoot software and hardware issues

Proactive, real-time management and monitoring, and automated issue detection

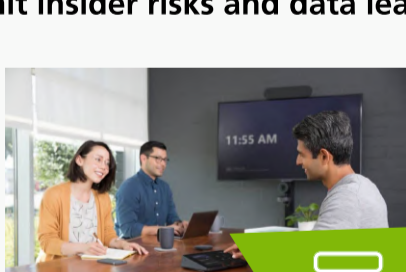

Unlock Secure and Compliant Productivity

A more remote, digitally connected workforce has increased the attack surface and made compliance difficult.

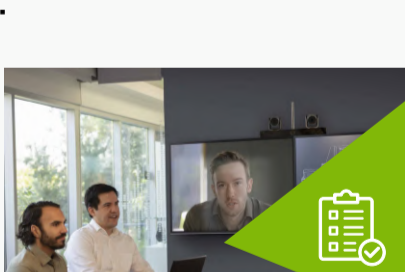

AVI-SPL and Microsoft help you host data leaks and limit insider risks and data leaks.

Mitigate insider risks and unauthorized data leaks through information barriers

Securely archive content

Audit and report activities, communications, and business events for compliance

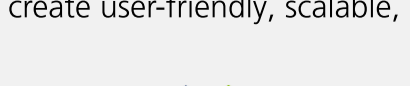

Take the Next Steps for Reimagining Your Workplace

Discover how you can improve employee engagement with a reimagined meeting space.
