

DEPLOY FUTURE-READY MEETING SPACES WITH EASE

Simplify conference room setup with tech bundles

Many IT teams face mounting pressure to modernize meeting spaces while balancing time, budget, and user expectations. Managing multiple vendors, complex room designs, and inconsistent experiences can slow down deployment and frustrate employees. The result? Delayed rollouts, increased support tickets, and reduced productivity.

Avoid the complexity of conference room design and deployment. This secure and user-friendly Microsoft Teams Rooms solution, featuring LG, Jabra, and Salamander, gets your spaces up and running quickly so teams can connect without disruption.

READY-TO-DEPLOY COLLABORATION SPACES

Organizations no longer need to piece together multiple technologies to create a functional meeting room. This bundled solution combines Microsoft Teams, LG, and Jabra into one seamless experience. Whether you are equipping a small huddle room or a larger conference space, you can select the Jabra PanaCast 50 MTR, a Salamander Acadia Tabletop Stand, and the LG display size that best fits your space: 43, 50, or 65 inches. With installation and setup in under 90 minutes, IT can give employees instant access to collaboration spaces that simply work.

STREAMLINE DESIGN AND STANDARDIZE EVERY ROOM

IT leaders often struggle with the burden of multiple vendors, complex designs, and inconsistent user experiences. This solution removes that friction by standardizing the layout, features, and functionality across rooms. With a consistent design, IT can deploy quickly, reduce support needs, and provide employees with the confidence that every meeting space will deliver the same high-quality experience.
