

# ELIMINATE CAMPUS LEARNING BARRIERS WITH INTUITIVE WHITEBOARDS

## SMART BOARD GX PLUS, THE HANDS-ON LEARNING SOLUTION FOR EVERYONE

Over [4 million U.S. college students have a disability](#). Yet many still face accessibility hurdles in the classroom. Some students face physical limitations, like navigating a classroom layout or reaching a whiteboard. Others are neurodivergent and often need tactile, visual, and interactive learning experiences.

The technology educators select can either promote or impede equitable learning experiences. Intuitive tools can break down barriers, increase engagement, and improve outcomes for every student.

## INTERACTIVE WHITEBOARDS OPEN HYBRID LEARNING TO EVERYONE

Students with disabilities and neurodivergent learners face unique challenges in the classroom and online. Every student can fully participate in class with technology that supports multiple ways of seeing, hearing, and interacting with lessons.

Large, interactive whiteboards, like the SMART Board GX Plus, make it easy for students to see and follow lessons. Educators can magnify images and text for improved readability.

Additionally, the interactive screen supports hands-on student participation. Students can solve problems directly on the screen with digital pens. These features give students and faculty multiple ways to engage visually, tactilely, and collaboratively. So learning is active and inclusive.

The [SMART Board GX Plus](#) also addresses physical accessibility. Mobile stands and height-adjustable options let every student interact comfortably, regardless of physical limitations. And the whiteboard's cloud integration extends learning beyond the classroom, keeping lectures and notes available anytime, anywhere.

## A SIMPLE, SCALABLE, AND SMART INVESTMENT

SMART's GX Plus is simple for instructors and students to operate, and for IT to integrate and manage. Quick setup, minimal training, and flexible classroom deployment make it a practical choice for institutions looking to maximize resources.

GX Plus integrates seamlessly with existing AV and UC tools to support consistent, high-quality hybrid learning experiences.

For institutions planning long-term technology strategies, this combination of simplicity and scalability delivers tangible value. Classrooms benefit from consistent, high-quality hybrid learning experiences.

## AVI-SPL AND SMART WORK TOGETHER TO DELIVER ACCESSIBLE LEARNING AT SCALE

### Ready to make campus collaboration accessible to everyone?

AVI-SPL can design tailored solutions with SMART's GX Plus at the center. Students and faculty enjoy frictionless, inclusive learning, and the investment scales across classrooms and programs.

[Contact AVI-SPL](#) to design, deploy, and manage campus solutions that make learning accessible for everyone.
